Guided micropulse level indicators PulsFox® PMG 10

- Reliable, accurate measurement even with foam, vapour, dust or turbulent surfaces of the medium
- Robust housing for rough ambient conditions
- Maintenance-free, not subject to wear and tear

For continuous level measurement in containers, tanks or silos. Suitable for liquid, powdery, granular, electrically conductive or non-conductive media. Ideal for changing media. Also suitable for pressurised or vacuum tanks.

Description

PulsFox® PMG 10 level indicators operate on the basis of the guided micropulse principle (TDR, time domain reflectometry). A micropulse is emitted along a probe. The micropulse is surrounded by an electromagnetic field. Reflections of the pulses from objects and surfaces serve as the basis of distance measurement. The pulse's propagation time is directly proportional to the distance between the probe and the surface of the medium. The reflectance of materials depends on the dielectric constant er. Changes of the medium (e.g. vapour, dust or a turbulent surface) do not affect the measuring accuracy of this measuring principle. No recalibration is required when a different medium is used. Even if properties such as pressure, temperature and density change, the system operates with high reliability and precision. PulsFox® PMG 10 has no moving parts and is therefore maintenance-free and not sub-

Application examples ■ Cement silo

- Liquid bitumen
- Containers for construction materials such as mortar, plaster, gypsum
- Silos for additional fuels such as meat and bone meal or dried sewage sludge
- Tanks for liquefied gas such as LPG, LNG
- Tanks facilities for ethanol fuel
- Tank facilities for hydrochloric acid
- Storage of intermediate products, chemical industry

- Supply tanks for hydraulic oil
- Condensation tanks for liquids
- Water separators located prior to vacuum
- Small and medium size tanks for raw and finished products in refineries
- Level measurement in facilities for leachate treatment
- Supply water tanks of turbines
- Level measurement in bodies of water

Technical Mea specifications MS:

Technical Measuring range

MS: \leq 3,000 mm MF, DF: \leq 24,000 mm KX: \leq 6,000 mm

Dielectric constant (Er) of medium

MS, MF: ≥ 2.1 DF: ≥ 1.8 KX: ≥ 1.4

Operating temperature range

Medium: -30/+200 °C
Flange: -30/+90 °C
(High temperature: -30/+200 °C)
Ambient: -30/ +60 °C
(with display: -20/+60 °C)

Process pressure

MS: PN 16 or PN 25 MF, DF, KX: PN 16

Process connection

See technical specifications of the individual versions

Supply voltage

4-20 mA, 2-wire (18-35 V)

Output signal

4-20 mA/HART, 2-wire

Housing

Aluminium die cast

Flexible

Flevible dual

Degree of protection

IP 65 (EN 60529)

Electrical connection

2 x cable gland

Option

- Local display/programming display PD 10 PMG
- Other process connections
- FEP/PFA/PP coatings

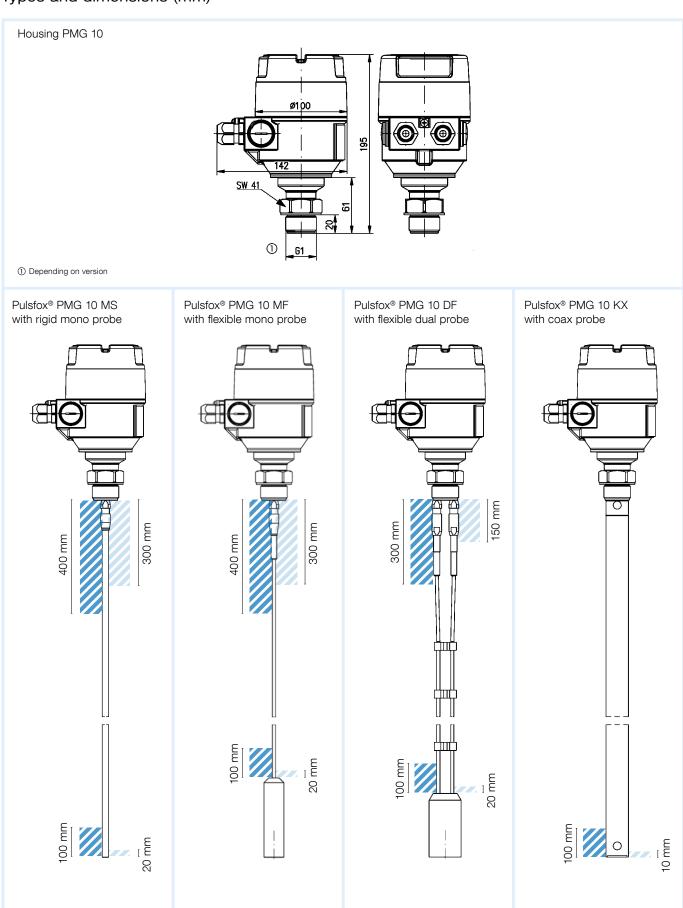

Guided micropulse level indicators PulsFox® PMG 10

Types and dimensions (mm)

Blocking distance with a medium with ϵr value = 80

Guided micropulse level indicator with flexible dual PulsFox® PMG 10 DF

- Small minimum distances
- Also suitable for high tanks (> 6 m)
- Only for non-adhesive media

Technical specifications

Measuring range

Max. 24,000 mm

Dielectric constant (Er) of medium

≥ 1.8

Measuring accuracy

Better than: ±0.05% of probe length (min. ±5 mm) in the case of liquids $\pm 0.2\%$ of probe length (min. ± 20 mm) in the case of powder/solids

Probe material

Stainless steel 316

Wetted parts

Stainless steel 316, PTFE, FKM
